

Using OpenAPI in Julia

Describe, Produce & Consume Web Services

May, 2023

1. Introduction
2. Hands On
3. Summarize, Q&A

1. Introduction

What is OpenAPI

Compare & Relate to Other Standards

OpenAPI in Julia & JuliaHub

HTTP REST APIs - an example

Source: https://www.researchgate.net/publication/342124274_Plug-and-play_mix-and-match_a_capital_systems_theory_of_digital_technology_platforms

What is OpenAPI

- ✓ Interface Specification for HTTP APIs
- ✓ Leverages REST (REpresentational State Transfer)
 - Web Service has Resources that clients can fetch
 - Resources have States
 - Actions create Resources or change States
- ✓ Standard & programming language agnostic

Goal is to allow both humans & computers
to discover and understand the capabilities of a service (server)
without access to source code, documentation, or through network traffic inspection.

What is OpenAPI

Origins

- Donated to the OpenAPI Initiative by SmartBear Software
 - Renamed Swagger Specification to OpenAPI specification (2015)
- First official release (v3.0.0) in 2017

OpenAPI ↔ Swagger

- OpenAPI = Specification (<https://spec.openapis.org/oas/v3.1.0>)
- Swagger = Tools for implementing the specification (<https://swagger.io/tools/>)

What is OpenAPI

- ✓ Simple and widely understood
- ✓ ~70% of APIs available have REST endpoints
(ref: <https://smartbear.com/blog/an-introduction-to-restful-apis-infographic/>)
- ✓ Loosely speaking, OpenAPI is a specification for REST APIs
Narrower in scope than REST
- ✓ Tools to help Create Specifications
- ✓ Tools to Generate Code, Documents, Tests

{ REST }

What is OpenAPI

Compare & Relate to Other Standards

SOAP (Simple Object Access Protocol)

- Transport agnostic
 - e.g. HTTP, FTP
- XML Data format only
- Includes several extensions for peripheral protocols
 - e.g. WS-Security, WS-Addressing, WS-Federation
- Verbose and complex
- Suitable where extensions add significant value

What is OpenAPI

Compare & Relate to Other Standards

- RPC Oriented
 - gRPC, ProtoBuf, Thrift
 - JSON RPC, XML RPC
- Graph APIs
 - GraphQL
- More special purpose
- Not as widespread
- But some are becoming popular

OpenAPI in Julia

Specification Implementation

- ✓ **OpenAPI Generator**
<https://openapi-generator.tech/>
- ✓ **OpenAPI.jl**
<https://github.com/JuliaComputing/OpenAPI.jl>
- ✓ **Swagger.jl**
<https://github.com/JuliaComputing/Swagger.jl>
soon to be deprecated

API Integrations

- ✓ **Kubernetes** (Kuber.jl)
- ✓ **Azure Cloud** (Azure.jl)
- ✓ **Collaboration Tools**
e.g. GitHub, Slack, ...

OpenAPI in JuliaHub

An **enterprise computing platform** for distributed, cost-effective, and reproducible computing. Optimised for Julia.

Run Apps & Scale
Julia Jobs

Kubernetes

Data Catalog & App
Storage

S3, EFS, EBS

Docs & Package
Registry

Julia Pkg.jl

Julia IDE &
Notebooks

VS Code, Pluto

2. Hands On

Quick Demo:
Consume an API endpoint

Ground Up:
Define, Serve & Consume APIs

Consume OpenAPI Endpoint

- ⋮ Interface with GitHub
- ⋮ OpenAPI specifications
<https://github.com/github/rest-api-description>
- ⋮ Notebook
<https://github.com/tanmaykm/TalksAndMore/2023/OpenAPI/>

Define, Serve & Consume APIs

- ⋮ Create a Specification
- ⋮ Generate Code and Docs
- ⋮ Implement & Deploy Service
- ⋮ Use APIs in an application
- ⋮ Notebook

<https://github.com/tanmaykm/TalksAndMore/2023/OpenAPI/>

3. Summarizing...

(Q&A)

- Discussed OpenAPI and related standards
- Quickly integrated with an existing service (GitHub)
- Defined a specification
- Implemented & Deployed a Service
- Accessed the service

Slides & Notebooks:

<https://github.com/tanmaykm/TalksAndMore/2023/OpenAPI/>

(Q&A)

Thank You!
